

Intelligence. Efficiency. On Demand.

Mr. SLIM™

TOTAL COMFORT, EXCEPTIONAL EFFICIENCY AND AMAZINGLY QUIET OPERATION,

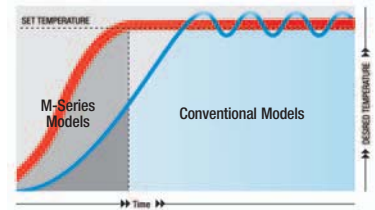

ALL PACKAGED IN A SLEEK DESIGN. THE MR. SLIM M-SERIES IS THE IDEAL DUCTLESS SOLUTION FOR HOMES AND LIGHT COMMERCIAL HEATING AND COOLING APPLICATIONS AND IS AVAILABLE IN SINGLE AND MULTI-UNIT MODELS.

ENERGY EFFICIENT

EFFICIENT

Watch your energy costs drop thanks to high-efficiency VCSi technology that powers your M-Series units. Instead of constantly switching between OFF and full-powered ON, VCSi systems precisely control compressor speed at low frequency to keep your room temperature steady. This means that Mr. Slim systems actually use less power to maintain your total comfort, passing the energy savings on to you.

QUIET

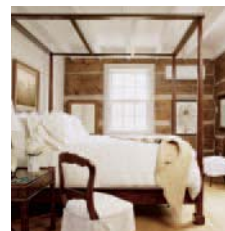

QUIET

You don't have to raise your voice whenever your M-Series is on the job. Mitsubishi Electric's advanced technology has led to the creation of super-quiet air conditioners and heat pumps that operate more quietly than a whisper.

STYLISH & EASY TO INSTALL

EASY

All our M-Series ductless wall-mounted systems are lightweight, compact, stylish, and blend into the smallest of spaces. Using only a small 10 cm opening to connect the refrigerant and power lines between the indoor and outdoor units, the job can be done in a fraction of the time it would take to install a conventional system, even where there is no existing ductwork!

THINKING GREEN

GREEN

Saving the environment is second nature at Mitsubishi Electric. All M-Series units use the ozone-friendly R-410A refrigerant which has no CFC or HCFC, and has zero Ozone Depletion Potential (ODP). What's more, Mr. Slim R-410A systems also offer significant improvements in efficiency and performance!

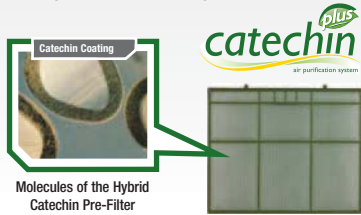

A BREATH OF FRESH AIR

FRESH

At Mitsubishi Electric, your home comfort means more than maintaining the temperature of your rooms. Equally as important to us is the quality of the air you and your family breathe. That's why every M-Series indoor unit is equipped with our Catechin Plus Air Purifying System to keep your air fresh in 2 different ways:

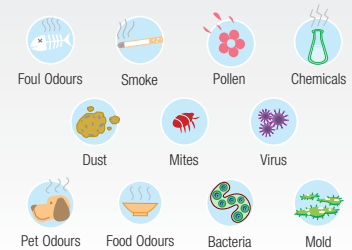

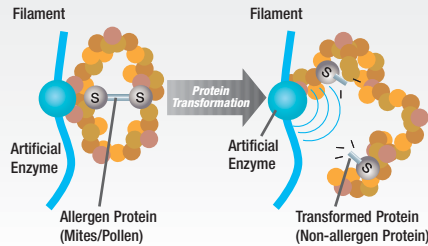

CATECHIN PLUS PRE-FILTER

Catechin, a bioflavonoid found in green tea, is known for its deodorizing, antibacterial and antiviral properties. It has been infused into every cell of the pre-filter to keep the air in your home healthy.

ANTI-ALLERGY BLUE ENZYME FILTER

Traps dust, pollen, mites and other particles that can cause allergic reactions. The artificial enzyme catalyst helps break down S-S bonds in these allergens, transforming them into harmless proteins.

FEATURES AT A GLANCE

FEATURES

- Catechin Plus Pre-Filter
 - Anti-allergy Blue Enzyme Filter
 - Econo Cool
 - PAM Control
 - LCD Wireless Remote Control
 - Cooling at -10°C/14°F
 - Fuzzy Logic "I Feel"
 - Super-Quiet Technology
 - Powerful Cool
 - Auto Change Over
 - New LEV Control
 - Wide & Long Airflow
 - Auto Mode
 - 5-Step Vane Control & Swing Mode
 - Auto Restart
 - Anti-rust
 - Self-Diagnostic Function
 - 24-Hour ON/OFF Timer
 - Easy-Clean Design
- Heat Pump Models ONLY
Cooling Models ONLY

M-SERIES SOLUTIONS

SOLUTIONS

SINGLE DUCTLESS SPLIT SYSTEMS COOLING ONLY

Whisper-quiet technology lets you subtly cool any room easily and affordably. Sleek, wall-mounted indoor units can be installed over windows or doorways to stay out of the way, and fit perfectly into any decor.

SINGLE DUCTLESS SPLIT SYSTEMS HEAT PUMP

Get exceptional high-speed heating and cooling performance through the compact wall-mounted indoor unit to maintain temperature control without obtrusive ductwork. Quiet, efficient and economical.

MULTI-DUCTLESS SPLIT SYSTEMS HEAT PUMP

Mr. Slim Multi-Split systems lets you connect 2, 3 or 4 indoor units to a single outdoor unit to provide customized temperature control while reducing electrical costs and needed outdoor space. Each indoor unit has its own remote control for customized comfort.

WITH A WIDE SELECTION OF VARIOUS CAPACITIES AND MODELS, THERE IS A MR. SLIM THAT IS JUST RIGHT FOR YOUR NEEDS.
